## Experience overview

<b>Period</b>	June 2011 / current
Organization:	ActuIT
Project name:	Different projects
Branch:	Financial services
Role:	Consultant / Front end Developer
Situation:	With the software package Futurama, we tailor pension plans for various pension funds
Activities & responsibilities:	I was responsible for all work on the Front End when making pension planners. I processed the wishes of the customer but also gives advice to the customer if there is a possibility to improve the usability. In the development of pension planners, I mainly concerned with creating the functionality of the website using Javascript and jQuery. I made for a number of clients a custom implementations in React. I developed the pages with HTML and for the layout I used Less / CSS (3) with responsiveness as the main key. I also helped developing the backend. I made several adjustments including making it possible to communicate serverside with a jQuery UI client controls and React components. I did this mainly by programming the backend with .NET and the front end with jQuery / React and XSLT
Results:	Various pension planners have been developed in which the pension communication wish is fulfilled
Operating systems & Hypervisors:	Windows
Software & Tools:	Atom, NotePad++, Visual Studio (code), Futurama, SQL management studio
Programming languages and Frameworks:	HTML, JavaScript, React, .NET, HTML 5, CSS, Less, jQuery, XML, XSLT, Ajax, SASS, Json, Bootstrap

<b>Period</b>	2010 / 2011
Organization:	Digital Monkey
Project name:	Process Photoshop/Illustrator templates to Websites
Branch:	Services
Role:	Front End Developer
Situation:	I migrated various Photoshop / Illustrator designs to websites.
Activities & responsibilities:	<p>I created several websites for the company with the focus on transforming the design to interactive websites.</p> <p>The applications were made using techniques such as: HTML / CSS / JavaScript / jQuery and PHP. Especially payed attention to creating responsive designs.</p> <p>Stefan has also been involved in the development of server side functions with PHP.</p>
Results:	The project was delivered to the satisfaction of the client.
Operating systems & Hypervisors:	Windows 7
Programming languages and Frameworks:	HTML, JavaScript, XML, CSS, jQuery, PHP
